

Base-10 “Buildings”

Home Link 1-12

NAME _____

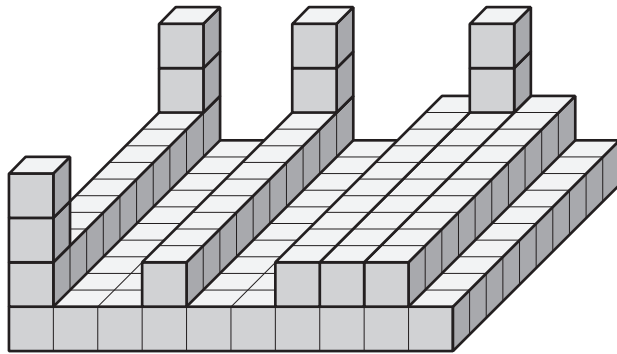

DATE _____

Family Note

In today’s lesson, children were introduced to Grade 2 Explorations. Explorations are small-group, hands-on activities designed to introduce or extend mathematical topics. One of the Explorations reviewed the values represented by base-10 blocks. Children made “buildings” with the blocks and calculated the values of the buildings.

Please return this Home Link to school tomorrow.

Look at the picture of a “building” that is made with base-10 blocks.

■	=	1
	=	10
□	=	100

Count the value of the flats, longs, and cubes that make up the building. What number does the building show? Use the symbols in the box to help you. _____

Write about how you counted the blocks.
